

## Data Collection with KoBoCollect and Enketo webforms: iPhone

---

KoBoCollect survey forms can be used on any smartphone: iPhone, or android. A web browser is the only app required. Follow the steps listed below, and you will be ready to collect data in the field with, or without internet access.

# Before you start

---

What you will need:

- A mobile device (such as an iPhone), with a web browser, camera and GPS (be sure to allow geolocation in your device settings)
- Brief access to the internet

## Step 1

Before leaving network range, open your web browser on your mobile device. Insert the link <https://ee.kobotoolbox.org/x/#Y1qP> into the url field of the survey form. Click Go.

## Step 2

The survey form should now be visible in the browser window. Bookmark the url in your browser. Close the browser. The survey form can now be re-opened in the field without an internet connection.

## Step 3

Completing the survey form on site is straightforward. Respond to each query before moving on to the next until you reach the end. When all data is entered, click Submit. Yeah, you're done!
